

CprE 588 – Embedded Computer Systems
Weekly Reading Review #2
Assigned: Week 2
Reviewed: Week 3

Directions:

- These weekly readings are intended to support in-class discussion.
- An in-class review activity will structure the discussion, as well as provide the instructor and student with some regular feedback on learning in the course.
- These activities will be recorded (based on completion, not correctness) as a component of the student's grade in the course.
- Submission is via the "Assessments" tab in WebCT.

Reading:

[6] M. Schlett, "Trends in Embedded-Microprocessor Design", *IEEE Computer*, vol. 31, no. 8, pp. 44-49, August 1998. ([link](#))

Review:

Consider Figure 4:

1. Briefly state how Figure 4 serves as a summary of the article.
2. Briefly describe the relationship between Figure 4 and the digital camera example.

Type of Review: One sentence summary

Goals: Develop ability to synthesize and integrate information and ideas. Improve reading skills.
