

Ryan Janda
Non-Disaster Grants Implementation Branch Chief
Hazard Mitigation Assistance Division
FEMA

Ryan Janda is a Branch Chief in FEMA’s Hazard Mitigation Division and is a national leader in mitigation. Ryan has worked in the emergency management and response fields for nearly 30 years, most of which he has dedicated to working to increase community and tribal resilience to natural hazards. In his role at FEMA, he manages the national program delivery for three multi-billion-dollar programs. These mitigation programs have benefitted thousands of communities and numerous tribes over the last 30 years by preventing the loss of life and significantly reducing damage to thousands of structures and facilities. Ryan is committed to simplifying FEMA’s approach to grant delivery and increasing equity for underserved and overburdened communities and tribes. Going beyond his career, Ryan is the proud father of one and an avid fan of all things weather and transportation related.
