

Jerry R. Junkins

B.S., Electrical Engineering, 1959

Jerry R. Junkins served as president, chairman, and CEO of Texas Instruments, spending most of his career in the defense business as a manufacturing engineer and supervisor. He was responsible for radar projects, the Shrike missile program, and assembly and test functions; he oversaw the company's data and industrial systems, consumer products, and worldwide information systems network. Junkins led TI's efforts to gain recognition for the value of intellectual property and initiated strategies that changed the industry and played a role in revitalizing America's competitive position. He was elected to the National Academy of Engineering (NAE) and was awarded the ISU Anson Marston Medal.
