

## ***Tunç Doluca***

**B.S., Electrical Engineering, 1979**

Tunç Doluca joined Maxim Integrated Products as a design engineer, rising through the ranks to become president and CEO of the company.

In his early career, he designed over 40 products, ranging from data converters to breakthrough power-management products, and contributed to the growth of Maxim to \$2.5B in revenue. In 2011, Tunç and Lale Doluca created the Doluca Professorship in Electrical and Computer Engineering at ISU to advance the mission and vision of the department and to make a major impact on the college's ability to recruit and retain faculty. The professorship is awarded to faculty with preferences for specialized teaching or research in analog and mixed signal integrated circuit design.
