

Vijay Vittal

Ph.D., Electrical Engineering, 1982

Vijay Vittal was the recipient of the prestigious Presidential Young Investigator (PYI) Award, given by the U.S. President for his pioneering research. He served as the director of ISU's Electric Power Research Center and authored multiple influential textbooks on power system analysis. He was elected as Member of the National Academy of Engineering (NAE) and Fellow of IEEE. Vittal received numerous awards from professional societies and from ISU, including the Outstanding Power Engineering Educator Award and the Prabha S. Kundur Power System Dynamics and Control Award, both from the Power and Energy Society of IEEE, and the ISU Foundation Award for Outstanding Achievement in Research.
