Dear OSC user,

File System Failure

This email is to inform you of the severe GPFS failure experienced from 1 p.m. to 5 p.m. Tuesday, Dec. 27, which provides the /fs/project and /fs/scratch file systems on all our clusters. Any jobs running during this time may have terminated abnormally, and you may have received an email from the batch system with a message, such as 'Aborted by PBS Server Job does not exist on node' with no batch error or output files. Please check your jobs that were running during this time and report failures to oschelp@osc.edu.

The file systems are fully operational again, but we are working with the vendor to determine the root cause. We apologize for the inconvenience.

To stay up to date on system notices, please visit www.osc.edu/events or follow [@HPCNotices](https://twitter.com/HPCNotices) on Twitter. As always, you can contact us at [OSC Help](mailto:oschelp@osc.edu).

Thank you,

Brian Guilfoos
